

AMWA Business and Technology Membership Benefits for Media Companies

► Business Benefits

- **The market in which we operate** constantly changes and media companies need to respond quickly and effectively. The AMWA actively leads and supports technology solutions that are flexible and adaptable.
- **The AMWA provides an environment** which lowers the financial risk of technology decisions and helps you get maximum return on investment by building cost effective, well integrated systems.
- **Better management of media assets** enables an increase of revenue by wider distribution, efficient reversioning or resale.
- **Cost savings** can be achieved through the manpower efficiencies and the best use of personnel provided by better integrated workflows.
- **An appropriate mix** of automation and human resources allows you to get the best of both, allowing staff to be released for creative duties which add value, such as station branding and on-air look.
- **Do more with your finite resources** – more output and more reliability.

► Technology Benefits

- **AMWA is the only media-industry association** that focuses on enabling smoother, more efficient, workflows
- **The AMWA works to integrate** broadcast and IT interconnection standards with initiatives such as the Framework for Interoperable Media Services (FIMS) and Service Oriented Architecture (SOA) based solutions.
- **Interoperability is enhanced** using the Application Specifications defined by AMWA
- **Constrained MXF profiles** assure that movement of files works the first time, which saves time and money.
- **Standardized interconnections** allow you to build best of breed systems from your preferred suppliers.
- **The growing number** of media companies and vendors working with AMWA standards provides increasingly future proofed workflows.
- **Learn best practices** and avoid workflow pitfalls by associating with other AMWA members.
